

Wireless Pump Relay WR-110/T32

Retrofit Pump Relay to Wireless

WR-110 works with standard 24V controllers to create a wireless connection between a breaker box and the well (or irrigation) pump motor.

The system is capable of delivering 32Amps @ 115V/230V to a pump motor.

- UL listed components
- Free ISM radio band
- 2600 feet of range
- No WiFi, No Bluetooth, No Cell Phone
- No more wires between controller and pump relay
- 32Amp @ 115V/230V single phase
- Pump start relay unit is in Nema 4 weather tight enclosure
- WR-110T32 starts pump at 32 Deg. F. automatically
