

Wireless Pump Start Relay WR-115 / 230

WR-115 is a wireless pump relay that can activate a water or irrigation pump from a 24V controller (or any other electrical switch).

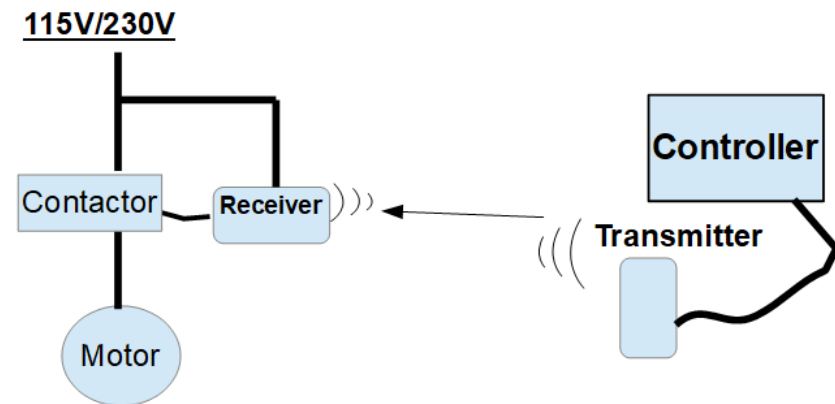

Features

- UL listed components
- Compatible with any 24V controller
- 24V-AC Output (50VA) to connect to Contactor

Specifications

- Transmitter is connected to the controller (operates from 9V-30V AC or DC)
- Receiver is connected to pump Contactor
- Operating temperature: -40 to 170 Degrees Fahrenheit
- Radio is FCC Certified
- Electrical Specifications: 115V/230V, 50-60 Hertz
- Receiver Box is powered from 115V/230V directly, and 24V output is connected to Contactor
- Transmitter Box is powered directly from controller

* National electrical code requires all motors to be thermally protected from excessive amperage drawn.
Note : Circuit breakers are NOT classified as motor protection.
